EXHIBITION PRIZE MEDAL!—RANSOME and PARSONS beg to draw the attention of Architects, Builders, and others, to their PATENT STONE, which, in its composition, differs essentially from all other artificial productions for a similar purpose.—Flint forming the basis in character, texture, and appearance, it is made to resemble every kind of natural stone, at pleasure, from the finest marble to the coarsest sandstone, and to possess all their valuable and enduring properties, without being liable to any of their defects. It is especially applicable to all kinds of architectural decorations and mouldings, fountains, balustrades for terrace walks, vases, and pedestals, &c. &c.; also for all varieties of plain and ornamental flooring. In price it is far below the cost of any natural product, and, in many cases, can be furnished as low as ordinary cement. Copies of Busts, Statuary, or other Works of Art, can be produced in the fine Patent Stone as faithfully as in Plaster of Paris.

IMPORTANT TO WATER COMPANIES, MANUFACTURERS, AND THE PUBLIC.

Ransome and Parsons beg to call the attention of Water Companies, Manufacturers, and others to their

PATENT STONE FILTERING SLABS,

which are capable of filtering from 100 to 120 gallons of water per superficial foot per day, with a head of water varying from 3 to 6 feet. These slabs can be produced to any required dimensions, and, consequently can be adapted to any cistern, tank, or reservoir. By a simple precautionary arrangement, they are prevented from being in any way choked or impeded in their action. Price 3s. per superficial foot.—Full descriptions and prices of their other descriptions of Filters will be supplied on application.

IMPORTANT TO BRICKMAKERS AND CONTRACTORS.

Ransome and Parsons are also the Proprietors of HALL'S PATENT BRICKMAKING MACHINE, capable of moulding 10,000 Bricks per day and upwards, which are superior to those manufactured by hand, and are produced at considerably less cost.—Communications to be addressed to the Patentees, Messrs. RANSOME and PARSONS, Flint wharf, Ipswich.

GREY-STONE LIME.—HALL, Brothers, Merstham Lime Works, near Reigate, beg to offer to Builders and others a list of their prices for Cash on delivery.

Grey-Stone Lime	4s. 9d. per Yard, or 36 Bushels		
Ditto, for Manure	4s. 6d.	ditto	ditto
Ditto, Ashes	1s. 6d.	ditto	ditto
Black ditto	3s. 6d.	ditto	ditto

In not less than Six Yard quantities, and put on the Railway for all goods stations on the London and Brighton, and South-Eastern Railways, or lines connected with them. A fresh supply had from the kilns daily, at the Bricklayers' Arms and Croydon Stations, and delivered to all parts.

Prices for Cash on delivery:—2s. per yard at the stations or works; 2s. per yard delivered within five miles; in not less than 3-yard quantities. Boxing, 2s. per yard; 1s. per yard off, if paid monthly. Collecting charred lime. The Quality is warranted to be the Best.—Address, Merstham, near Reigate, Croydon; or Youll's place, Old Kent-road.

GREAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving scarcely any core. The satisfaction constantly expressed by Engineers, Architects and Contractors of the above, is its best recommendation.

Gibbs, Canning, and Co.'s Blue Vitrified Bricks, Pipes, Junctions, Bends, and Fire Goods.

ROMAN, PORTLAND, PARIAN, ASHTON, and LIAS CEMENTS of the best quality.

SECOND PAVIORS, STOCKS, and other Bricks.

CHARLES RICHARDSON, 6, South Wharf, Paddington.

PERMANENT STUCCO WASH, WITHOUT LIME OR OTHER CORRUPTIBLE INGREDIENT.

As used at St. George's Hospital, Hyde Park Corner.

JOBBS and CO. having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing every advantage over the common Lime Wash or Water Colour for STUCCO or BRICK WORK. It is a Stucco Colour, but may be tinted to any shade.—DOES NOT WASH OFF.—is perfectly dry in twenty-four hours, and, being a non-absorbent, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One coat will cover 20 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOBBS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and the enlargement for internal as well as external purposes, places it above all other materials of its kind; it has no coarse qualities; may be painted or papered in a few days; never blisters, cracks, or peels; does becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained, on application to the Sole Agent, PHILIP HARE, at the Warehouse, 22, Steed-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

BRICK BEAM at the EXHIBITION BUILDING. Erected by J. B. WHITE and SONS, MILLBANK-STREET.—For diagram and description of this beam, constructed of Portland Cement and Hollow Bricks, broken down with a weight of 63,000 lbs., 22nd September, 1851, in presence of the Jury of Class IV.—See "The Builder" Sept. 27, No. 461; and Times and Chronicle, Sept. 25, "Exhibition Article."

JOHN BAZLEY WHITE and SONS, MILLBANK-STREET, Westminster, Manufacturers PORTLAND CEMENT of the best quality.

ATKINSON'S CEMENT, made from Whitby stone, supplied from the Malgrave Estate; and ROMAN CEMENT, made of Sheppey and Harwich stone.

These cements are all used for external purposes, either for Brickwork or as Stucco.

For internal uses they Manufacture and Sell—

KEENE'S CEMENT;
PARIAN CEMENT;
FRENCH PLASTER;

The qualities of which are well known as quick-drying and hard stucco, that can be painted upon within a few days.

Warehouses in London:—
Millbank-street, Westminster;
South Wharf Road, Paddington;
Earl-street, Blackfriars; and at
Seel-street, Liverpool.

6, South Wharf, Paddington.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality, as testimonials before obtained in Portland Cement. It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack, combined with which the eminent hydraulic properties stamp it as one of the first Cement of the day for work where all the above qualities are required. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by R. GREAVES, Esq., at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

PORTLAND CEMENT.—JAMES WESTON, having commenced manufacturing the above Cement, begs to inform the trade in general that he can supply them with any quantity they may require, either at his Works—Mill-wall, Poplar; St. Andrew's Wharf, Earl-street, Blackfriars; or Middle Scotland-yard, Westminster. Manufacturer of Roman, Lias, and Master Cements, French and English Plaster, &c.

PORTLAND CEMENT, in Casks of Four Imperial Bushels. QUANTITY, NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

PARIAN CEMENT for internal use, to be PAINTED IN A FEW HOURS, AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SONS, Patentees, Nine Elms, London.

MEDINA (ROMAN) CEMENT.—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the Sheppey Stone, but is much better adapted to engineering works, from the rapidity with which it sets and hardens under water. It has been long used at the great Breakwater at Cherbourg; in a similar work at Alderney; and at Dover new pier, to unite the masonry. The foundation of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new groyne at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and sea shingle. The work extends 300 feet into the sea, and is exposed to the most violent gales of the Channel, in a position where every former construction had been repeatedly washed away. The inconvenience of the varied qualities of Roman Cement are superseded by the use of this improved manufacture.

CHAS. FRANCIS and SONS, Nine Elms, London; or West Medina Mill, Newport, Isle of Wight.

PATENT PORTLAND AND ROMAN CEMENTS.—WINKFIELD, BELL, and CO., of East Greenwich, Kent, having now completed some heavy contracts, are prepared to execute orders to any extent for either of the above Cements, which they are quite prepared to prove exceed any others in their cementitious qualities at present manufacturing. Many highly respectable references can be given where their Cements have been successfully used. Orders addressed to their Works will be punctually attended to and terms cash. Where quantities are used a corresponding price will be made. Agents are wanting, and will be liberally treated.

ROMAN AND OTHER CEMENTS, Manufactured by J. M. BLASHFIELD, successor to the Patentees, PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT; also Tarras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Trusses, &c.

Manufactory, Mill Wall, Poplar; Depôts, Commercial-road, Lambeth, and Paddington-basin.

GEORGE and THOMAS EARLE, CEMENT MANUFACTURERS, HULL.

Light and Dark equal to any made.

Also, Manufacturers of PLASTER, MASTIC, &c.

Importers of MARBLE and PUZZOLANA.

Dealers in Slates, Slabs, Hair, Whiting, &c.

PARQUETS.—Architects, and other visitors to the Architectural Exhibitions, Portland Gallery, are requested to inspect the specimens of Parquet Borders and Portfolios of Designs exhibited by the LONDON PARQUETRY CO., Whitefriars-street, and also to view their splendid Parquets in the gallery of the LANGHAM BAZAAR, Regent-street, a few doors from it.

LONDON SMOKE.—The new Act for the Prevention of Smoke having come into operation on the 1st of January, all persons offending against it are liable to a penalty of 5l. per day. Mr. BOOTH, of Nos. 1 and 10, Portland place, Wandsworth-road, London, respectfully informs the public that he has a PATENT PLAN for the ANNIHILATION of SMOKE, which saves fuel, is cheap, perfect, and complete. It does not require brick chimneys, but only wooden or iron pipes in them. It may be seen at work daily at the above-named works. It is not connected with any machinery, the whole being the arrangement of a few bricks made on purpose for the construction, and may be put up by a common bricklayer.
